

# Improve Your Gas Delivery System

High Purity Resources provides full turn key system installations for cryogenic nitrogen or argon gas or liquid. In addition to providing installation and consultation, we offer service contracts to make sure your investment is maintained properly.

## Improve Cost

- Systems can pay for themselves within 24 months
- No more monthly fees for tank rental
- Raw cost savings for gas or liquid
- Reduced billing & procurement cost
- You own the system so it is an asset
- No special permits required, or additional reporting
- Liquid can be supplied on a blanket purchase order

VBC Cobra-Flex

## Improve Process Efficiency & Purity

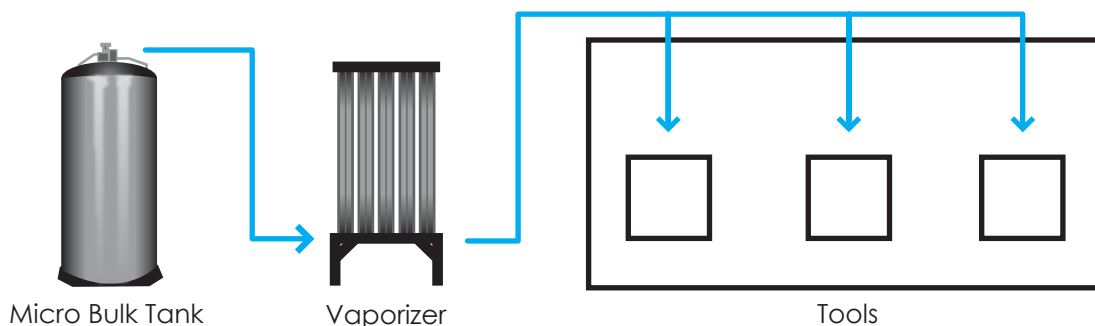

- No broken connections meaning no ambient air contamination
- Single source for multiple points of use
- No equipment downtime on installed systems
- Less product loss from venting "standby" dewars
- Frees up additional space in the work area
- Continuous gas supply 24/7

VBC Semi-Flex

## Improve Safety

- Storage units can be installed inside or outside building
- No more cylinder handling
- No dewar venting inside building
